116 Coastal Redwood/Solid*

*Coastal Redwood is available in steel only.

Note: The reverse side of the aluminum color fusion coil is coated with a solid color only. Cedarwood sidings are coated with KYNAR 500® coating.

COIL COATING GUIDE

All Gentek coil coatings have been formulated and tested to provide a durable, low-maintenance finish that will enhance the beauty of homes for years. Gentek's Performance G8 coating is a low-gloss, lightly textured finish with a specially formulated Polymeric Modified Polyester System that provides outstanding UV resistance and stain protection from trees, dirt and other environmental elements.

Our Poly (LoMar) polyester coating provides a soft, low-luster satin finish with excellent resistance to surface marring and scuffing.

A premium semigloss coating, our PVC (polyvinyl chloride) finish is several times thicker than ordinary coatings. The extra thickness provides excellent resistance to surface wear and abrasion and extends the life of the coating beyond ordinary painted finishes.

For all your coil needs – whether high gloss or low gloss, textured or smooth, monotone or multitone – we have a palette of colors in aluminum and steel that will match your design and construction requirements.

NOTICE TO CONTRACTORS:

This color selector represents the wide range of coil colors available. For additional colors, please contact your supplier to confirm availability.
